VILLAGES

361 The village of Boruca is situated in a low depression on undulating hills, about 6 miles inland from the River Diquis (see fig. 3, *a* and *b*) and at an altitude of approximately 466 meters. As a rule, the day-time temperature
[132] is between 75 or 78 degrees F. The nights are fairly cool, and during the dry season, fog or a very heavy mist is common in the early morning often lasting as late as eight or nine o'clock. These hillocks have been cleared of forest, and are quite bare save for a few scattered shade or fruit trees. There are no
[363] streets, but several narrow foot and animal paths extend through the town. The Indians are accustomed to pick their way over the grass to the houses which are scattered over and in between the hillocks, forming a picturesque panorama which can be best seen from the summit of the two tall hills which flank the village on the northern and southeastern sides, respectively. Eastward, a trail leads down to a mountain spur which extends in a northeastern direction toward Curré, some 6 miles distant. Formerly, Boruca had
[346 a *cabildo*, or town hall. Today, this has disap-
177] peared, and the wooden schoolhouse and church with its haphazard wire fence are the only semblances of *ladino* architecture.
[351 Although most of the houses have no fences,
417] a very few have wooden ones, hemming in a garden with colored crotons, flowers, or some fruit trees. The school is starting a *manzana*
[245] of vegetables and fruit trees on the outskirts of the town. A small creek, with tree- or
● 312 bush-lined sides, known by the Spanish name of *La Quebrada* or the Boruca name of *Tupsi*, flows through the community, supplying

SUBSISTENCE ACTIVITIES

241 **Farming.** The farms of the *Boruca* contain from three to five *manzanas*, a *manzana* usually comprising about ten thousand
[804] square *varas** [continued p. 5-B, last paragraph]

*A *vara* equals 33 inches.

peoples (see p. 26), and are, curiously enough, practically the only group in modern Costa Rica who have retained their indigenous dress, even though many of their customs have unfortunately disappeared.

VILLAGES

water for washing purposes. The drinking water is derived from springs which are located in the northern section of the town.

Curré and Lagarto are river hamlets, lying in the very narrow plain cut by the Diquis River in its upper course. They are low, unhealthy locations, the houses situated in dense forest and thickets. As a consequence, they are not open and fresh as Boruca, but closed-in, and, for many months of the year, mosquito ridden. These villages have even less the aspect of a formal town than Boruca. Narrow, almost imperceptible foot paths lead from one of the widely scattered and nearly hidden houses to the other. There are no churches or schools, and perhaps there is one fence in both communities. Water is obtained from shallow wells on the river bank, from small creeks, or from the river itself.

Palmar Norte is on a flat right on the river bank. The forest comes to the outskirts of the town, but unlike the other river villages, the community itself is open and free of the bush. Palmar Norte is obviously under *ladino* influence. Here, there is a definite attempt to lay out a "town" in the Spanish-American sense, with a *plaza* or square, a church, school, several saloons and stores, the houses all with fences, and broad, wide, grass-covered streets connecting blocks or squares. It keeps its indigenous characteristics in the still ample space or gardens around the houses, and, of course, their construction which, for the most part, is like that of Lagarto and Curré. Malaria is prevalent among the *Boruca*, who are, otherwise, an exceptionally healthy people.

SUBSISTENCE ACTIVITIES

square *varas*.[15] The farms are away from the village, and are generally fenced in. The fence is nearly always made with living posts,

duLi

(*Cabécar*)

* 539 ● 312 757 [262] In the upper Coen, there are hot water holes called *duLi*. These were left by *sibu* so the Cabécares could cure their sores. When they bathe here, they cannot touch meat or salt for fifteen days.

THE PEJIBAYE

(*Bribri*)

* 539 824 846 *sibu* gave the *pejibaye* to the first people who were called *kabLawak*. Because of this one has to bathe with the fruit after a child is born, and in the early morning, chew it up and spit it out.

(16) TOBACCO[200]

(*Bribri*)

* 539 276 [261] *sibu* was alone thinking and smoking when a little *gorrion* came and asked him what he was smoking and to give him some. *sibu* said that it was tobacco grown in Talamanca in the tobacco patch. That is why one can ask for tobacco. One cannot ask for food, however.

CACAO (CHOCOLATE)

(*Cabécar*)

* 539 776 *sibu* had four wives whose names were *siru*, *soro*, *tiŋə* and *spaLbu*. Most of them had their faults and did not make life easy for him. *soro* never wanted to cook the birds that *sibu* brought in from the hunt. *tiŋə* always moved her hammock far away. *spaLbu*, the most beautiful of all, always hung her hammock very high out of *sibu's* reach. In fact, the only wife who did everything he wanted and was always nice to him was *siru*, the ugly one.

Suddenly, however, *siru*, the ugly one, found herself transformed. *sibu* turned to her and said, "From now on, everyone will love you. You are the good one."

* 539 824 This is why there are four kinds of cacao in Costa Rica, and why the people of Talamanca call the best kind *siru* (*Theobroma cacao* L.). The *pataste* (*Theobroma bicolor*

[200] *See* Linguistic Texts: *dua* (tobacco).
